These oval cups are are recessed on moulders in order to hold a side of the cardboard box during the moulding process by means of traditional cups on the opposite side.
Once assembled with their support, they can be used for handling boxes, plastic objects or anything with a limited gripping suface.
Their anodised aluminium support have a central threaded hole to fasten it to the machine. They are also provided with a nickel-plated brass plate to hold the cup in its housing and with one or two stainless steel screws for fixing them.
For the spare part, all you have to do is request the cup indicated in the table in the desired compound.
