

Standard executions		
Version	Symbol	Type
Guided		S3
Short guided (for light loads)		S5
Double guide		S6

Options	Suffix
Both connections on one head	from bore 25 mm. U
Special versions on request	/ S

The options can be combined (when this is possible).

For parameters of the loads and moments see from page 1.26.25.

For seal kits see from page 1.26.21.

Rodless cylinders, magnetic as standard.

Cylinders with direct power transmission through the tube slot onto the yoke. The new cushionings are adjustable at both ends; the flow rate is regulated from 0 to 100% by turning a pin of an angle of 90°. The new barrel is provided with grooves for fixing various accessories. The magnetic switches can be fixed by a bracket or directly in the tube; the reed switch will not protrude out the barrel profile. The side carriage (which can also be installed at a later date) is adjustable and this allows to use the cylinder with heavier loads; the guide moves by Teflon slides, fixed in the grooves of the tube. The short guided cylinders type S5, in comparison to the standard cylinder - 0 - stroke, is up to 42% shorter; the total fitting length is therefore reduced and the cylinder is more compact and money-saving.

For the magnetic reed switches ASV-ASC see page 1.26.40.  
For mounting accessories see from page 1.26.28.

How to order: 50 / 1000 S6U

50	/	1000	S6	U
Bore	/	Stroke	Type	Option

Technical data	
Fluid	Compressed filtered air with or without lubrication. Lubrication, if started, must be continued.
Pressure	2 ÷ 8 bar
Temperature range	-20 °C ÷ + 80°C
Materials	Heads: Anodised aluminium Tube: Anodised aluminium Seals: Polyurethane - Piston: monobloc/yoke: Aluminium Internal strip: Nylon External strip: Stainless steel AISI 304 Wiper ring: PVC Carriage: Aluminium
